Foley Industrial Engines Celebrates a Century of Service

Foley Industrial Engines located in Worcester, MA is celebrating its 100th anniversary as a warehouse distributor of industrial engines and parts. Founded in 1916, the company has evolved over the years to become a leading specialist in Perkins and Deutz engines.

Timken Names its Automotive Aftermarket Leadership Team

The Timken Company, a bearings and mechanical power transmission products company, announced it has realigned its automotive aftermarket leadership team to enable a greater focus on a growth strategy designed to be highly responsive to market needs and trends.

The Timken automotive aftermarket leadership team consists of the following associates: Brett Blauner, national sales manager; Rick Domin, training and product support manager; Ryan Shaffer, manager regional marketing; Mark Stangl, manager global marketing; and Greg Sturm, product manager.

Pioneer Engines Boosts Business Model with Online Forklift/Industrial Engine Kit Store

Pioneer Engines, Warminster, PA, has launched *ForkliftEngineParts.com*, a new wholesale website designed for engine shops and forklift truck companies in search of top quality forklift engine parts and kits.

Engine kits and components for Caterpillar, Daewoo, Ford, GM, Mazda, Mitsubishi, Nissan, Peugeot and Toyota industrial engines are available for purchase by registered professional account holders.

Engine building companies and forklift dealers can register on the website and within 48 hours will be able to order directly on line and drop ship parts directly to their customers. "We put the parts to the test before we purchase or offer them," says Rick Ervin, company president.

Pioneer Engines has been remanufacturing industrial engines in suburban Philadelphia since 1971, and currently builds over 600 engines annually. "Building this many engines a year gives us a distinct advantage" Ervin explained. "Give us a shot – I'm willing to bet you'll be back!"

For more information, call Pioneer Engine Company at 215-773-9111 or visit www.pioneerengine.com.
